

Minimize Downtime with Our

VeloGuard WEAR & TEAR SELF-TEST SOLUTIONS

Starting from €2,970 per function

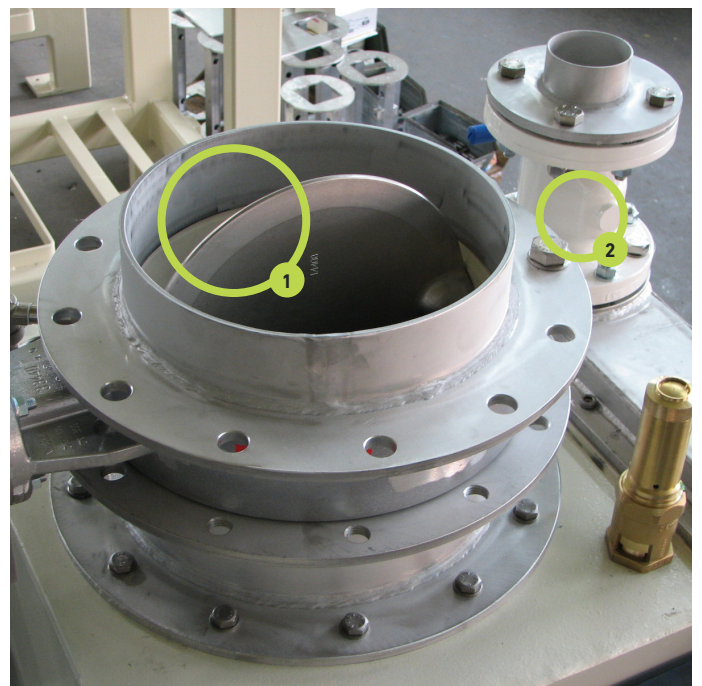

With the VeloGuard self-test solutions from GREIF-VELOX, your system gains added security through continuous automatic checks for the most common causes of system failures.

No downtime due to wear & tear:

The product inlet flap **1** and the venting function/tank venting mechanism **2** will now be constantly monitored. This eliminates errors in the machine's filling behavior and contamination due to overpressured and damaged bags.

Your Benefits:

- Elimination of lengthy troubleshooting by your technical departments
- Secure production times without unplanned downtime
- Improved ability to schedule downtimes for component replacement
- Direct wear & tear notifications to the system's HMI

Consult with Us About Retrofitting Your System:

Our team offers free consultations to help you implement the best solution for your equipment.

Please have your system number ready for quick reference.
